

Enhance Cattle Comfort

With Improved Air Quality

Maintaining optimal air quality and livestock comfort is vitally important to ensure the health & productivity of the animals. Below are the results of Schneider Family Farms installing our Altra-Air Sailfin HVLS fans in their pack barn:

REDUCTION IN RESPIRATORY ISSUES

- Reduction in ammonia levels which has resulted in reduced respiratory distress & other health issues

IMPROVED AIR QUALITY & CATTLE COMFORT

- Fans have significantly enhanced air circulation
- Noticable reduction in heat stress & respiratory issues
- Drier conditions have resulted in less manure tagging & improved hygiene & animal welfare

OPERATIONAL EFFICIENCY & COST SAVINGS

- Reduction in pack cleanouts from every 2 weeks or less to approximately every 3 weeks
- Huge cost savings on straw due to reduction in pack cleanouts due to drier conditions
- Extended pack longevity contributes to farms overall efficiency

“Since installing the fans we have noticed a considerable improvement in air quality, pack condition, cattle comfort & health.” - Schneider Family Farms Inc.

REDUCTION IN STRAW USAGE

		# of Bales Used Per Cleanout	Straw Value @ \$42 Per Bale	Straw Value Per Year
Before Fans	Cleanout every 2 weeks Approx. 26 cleanouts / year	24	\$1,008	\$26,208
After Fans	Cleanout every 2 - 3 weeks Approx. 20 cleanouts / year	20	\$840	\$15,960
Approximate Straw Savings Per Year				\$10,248 (39.1%)
